

The Gisela Imm Bloomenkranz Fund

In the University of Wisconsin-Madison Center for German & European Studies

Mr. Sol Bloomenkranz (1923-2017), a friend of the University of Wisconsin-Madison, established a fund in the Center for German and European Studies as a living tribute to the life and memory of his wife Gisela, who he described as “the most gentle soul who was selflessly committed to making everybody's life a brighter experience.” Sol and Gisela Bloomenkranz spent the majority of their married life of 58 years in major European capitals and US cities. Mrs. Bloomenkranz (1917-2014) grew up in different countries around the globe, and due to the fluency in German, English, French and Spanish, held a position as interpreter for Germany's leading newspaper, the *Frankfurter Allgemeine Zeitung*.

Sol studied Political Science at Northwestern in his native Chicago, until his studies were interrupted by World War Two. He served in the army, returned to Chicago to finish his degree, and then went on to graduate studies in history at the University of Zurich. While working for over a decade time for the US government in Europe, Sol met Gisela in Frankfurt. After their marriage, Gisela raised sons Larry and Dick while Sol left government service and became successful in European advertising. In their retirement in Florida, Sol's love of geopolitics prompted him to found a chapter of the American Council on Germany, a bipartisan organization which seeks to promote a greater understanding of German and European affairs. A committed transatlanticist, Sol also helped the Center for German & European Studies establish its own Madison Warburg Chapter of the American Council on Germany. Sol and Gisela Bloomenkranz embodied the strong partnership between Europe and the US, which has been so central to peace and prosperity in the era since 1945. The proceeds of the Gisela Imm Bloomenkranz Fund will be utilized to continue this important work in their memory, with the deepest recognition of their generosity and hard work.
